**Attachments:** image001.png

Thanks, Tom! Permission is only required if the figures have appeared in other published works.

Best,  
Jen

Jen, Mimi,  
I sent Helen a note, requesting the source files.

Is there any need for expressed permission to re-create these figures. Or has permission already been conveyed through Helen's authorship of this chapter.

Hi Tom,

Thank you for calling yesterday. I spoke with Mimi and we have the original source files for several figures in chapter 10, but we do NOT have those for 8.1-8.3. If you could go back to Helen Thompson for the original source files, it would be most helpful. Wiley can redraft, but they prefer to work from original files and not the embedded Word doc. As always, feel free to call with any questions. I'm around today, tomorrow and Friday (out Thursday.)

Best,  
Jen

Dave, Jen,  
Helen Thompson provided the revised tables 8-1, 8-2 and 8-3.

I can find those and resend if needed.

**Subject:** Re: Permissions for pollinators book

Good morning Dave,

Mimi is (technically) on vacation, so I'll chime in here, if that's okay. I can talk to the publisher about the Figures you mention below. They did mention the ability to redraft, so I'll see if they can help here.

All the best,  
Jen

**Subject:** RE: Permissions for pollinators book

Mimi,

The more I look at Figs 8-1, 8-2 and 8-3, the more they look to me to be drafts that need revision/polishing to be ready for actual publication. There's a notation in the caption that a diagonal line needs to be added—that's an editorial comment, not part of the actual caption. Are you or the publisher going to finalize these figures as is, or are they going to be professionally redrafted? They need the latter.

Dave

**Subject:** Permissions for pollinators book

Dear Tom and Dave,

Forgive me if I was not clear with you about permissions that we need for the pollinators book. I have the ones that Tom sent with regard to the images, but we will also need permission for those figures or tables that have been previously published. Here goes:

Figures 8-1, 8-2, 8-3 are attributed to Johansen et al. 1986...but there is no accompanying reference. So, we'll need the complete reference listing as well as permission to reuse those figures. We may very well be able to obtain the permissions online, but we first need the source.

Figure 11-1 is attributed to Wang M, Grimm V (2007) Home range dynamics and population regulation: an individual-based model of the common shrew. *Ecological Modelling* 205: 397-409. Permission through RightsLink will cost \$44.85.

Figure 11-2 is attributed to Wang and Grimm 2010 in ET&C, so no problem there. We will give Wiley the permission statement to include.

Figure 11-3 is attributed to Schmolke, A., P. Thorbek, D. L. DeAngelis, and V. Grimm. 2010b. Ecological modelling supporting environmental decision making: a strategy for the future. *Trends in Ecology & Evolution* 25:479-486. Permission through RightsLink will cost \$44.85.

Figure 11-4 is attributed to Martin, S. J. 2001. The role of Varroa and viral pathogens in the collapse of honeybee colonies: a modelling approach. *Journal of Applied Ecology* 38:1082-1093. Permission through RightsLink will cost \$276.00. *(Jen, this is a Wiley-published journal. Don't know whether that makes a difference.)*

Table 10-4 is attributed to a SETAC book, so not problem there. We will give Wiley the permission statement to include.

If this information is not accurate, please let me know. As well, please confirm that all the other figures and tables are original and not reprinted from a previous publication. Don't worry about the permission grant fees; we will take care of those, but we just needed to confirm that all of the above is accurate before we purchase the rights.

Thanks!  
Mimi and Jen
